

## **Basic Land Navigation Certification Process**

Several copies of the Basic Land Navigation manual were provided to each fire station in 2010 or the manual and supporting documents are available on the website at: <http://btutrainig.org/self-paced-training>

To get credit for Basic Land Navigation, employees must complete the BTU Basic Land Navigation chapter review document. The chapter review document must be submitted to the Training and Safety Bureau as an attachment to the completed Advanced Firefighter check off sheet.
